Dear Recruiter:

I have a strong desire to join your group and to be able to contribute to your projects and your endeavors. I will try my best to be a reliable, professional, hardworking employee and aid others the best I can. Although I currently do not have much experience yet, I will put in effort to provide as much value as possible. I am a fast learner, and am skilled at listening to others. Beyond that, I can communicate with people effectively and in a timely manner. I also attempt to take a positive attitude towards my professional life, being respectful of others simultaneously.

I have programming skills with the languages Java and Python, having spent time on my own learning the languages as well as within formalized institutions. I have mathematical skills beyond a high school level, and worked hard at improving them.

I hope you consider my application and thank you for your time.

Regards,

Henry Oviahon

Education

- University of Calgary, AB

  o BSc Computer Science September 2022 - April 2026 at earliest

Experience

- Math Kangaroo Mount Royal University

- Exam Proctor March 19 2023 - March 19 2023

  o Volunteered at monitoring a class taking an exam for a math contest.

- Calgary Public Library Country Hills Library

- codeTEEN volunteer May 13 2023 - June 17 2023

  o Volunteered at aiding a group of people learn game design and fundamental

    programming skills through following an outline given by the library staff on

    how to teach this information. Software used included Scratch and Code.org.

Skills

- Programming Languages: Java, Python, HTML5

- Problem Solving: I am able to break down problems into smaller steps in order to

  figure out how to solve them.

- Communication: I am capable of interacting and coordinating with other people in a

  cooperative environment. Although I struggled with this skill in the past, I have put in

  effort towards improving my capabilities and growing as a person.

- Teaching: I have mentored people in areas regarding technology and the basics of

  operating computers. I have gained experience and have learned a lot from

  participating in this type of task.
